

# CPSC 1030

## Lab13 – Grid Layout and @media

### Objectives

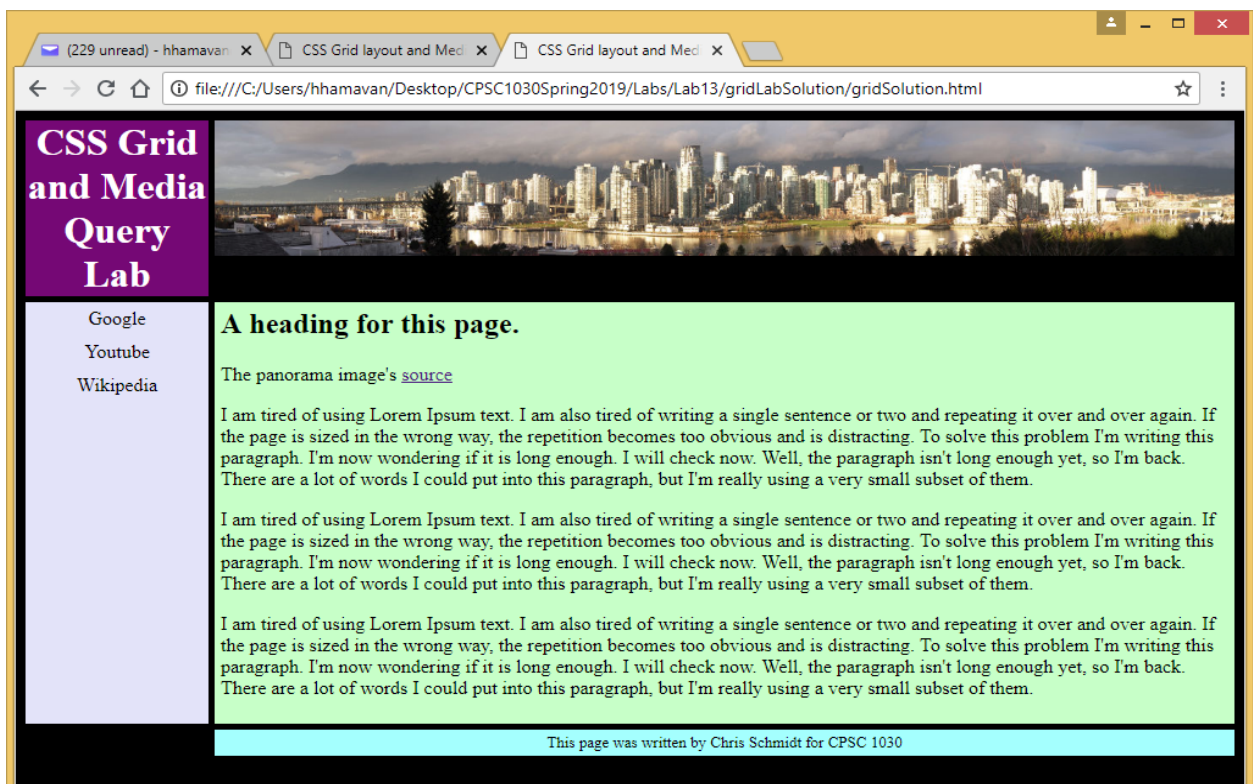

At the end of this of lab, you should be able to:

- Configure a website using CSS Grid layout.
- Use the CSS Media Queries to apply different styles for different media types/devices.

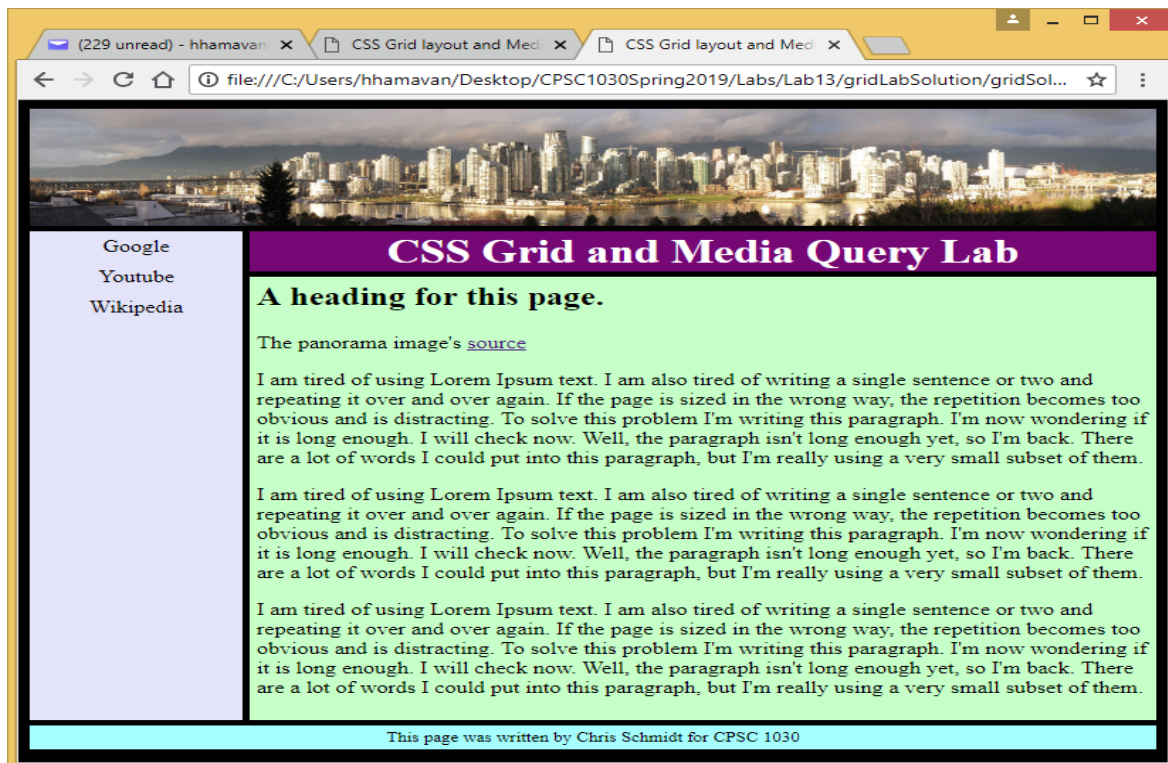

### Actions

1. Create a folder `H:\CPSC1030\labs\public_html\lab13` to store the results of this exercise's work.
2. Copy the files on the O drive Lab13 folder to your `H:\CPSC1030\labs\public_html\lab13`
3. Modify the `grid.css` file to style the grid web page look as follows:

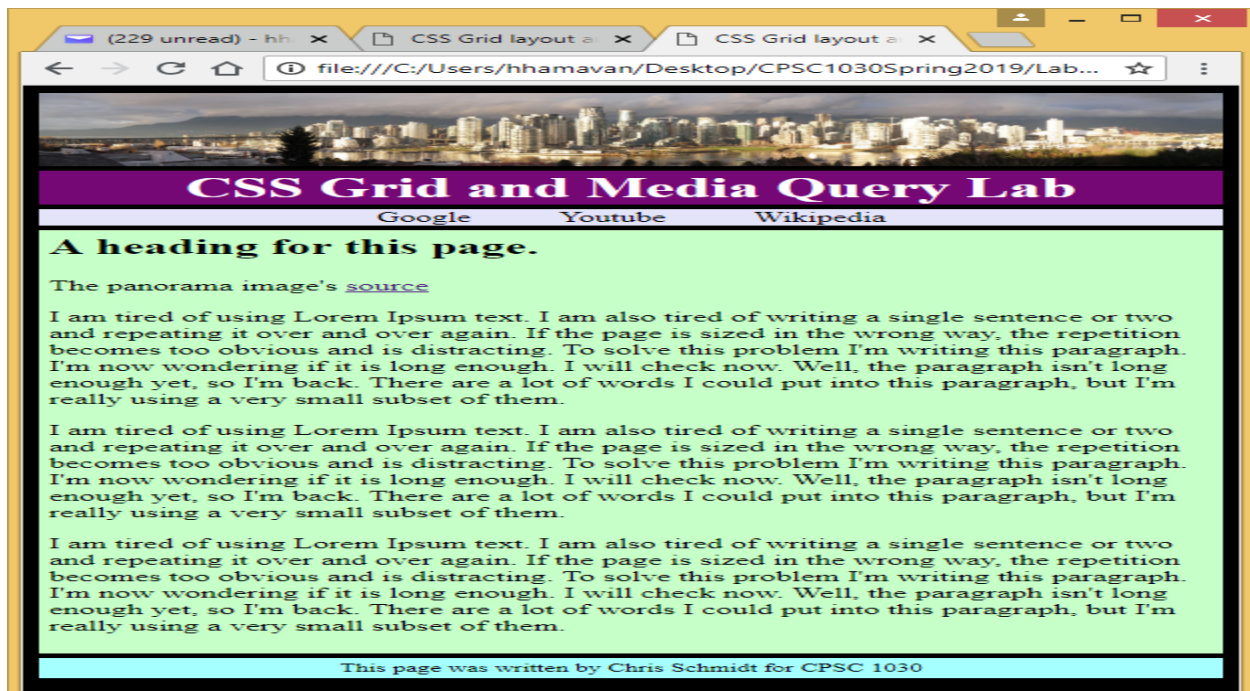

For any screen where the width of the viewport is greater than or equal to 1000px

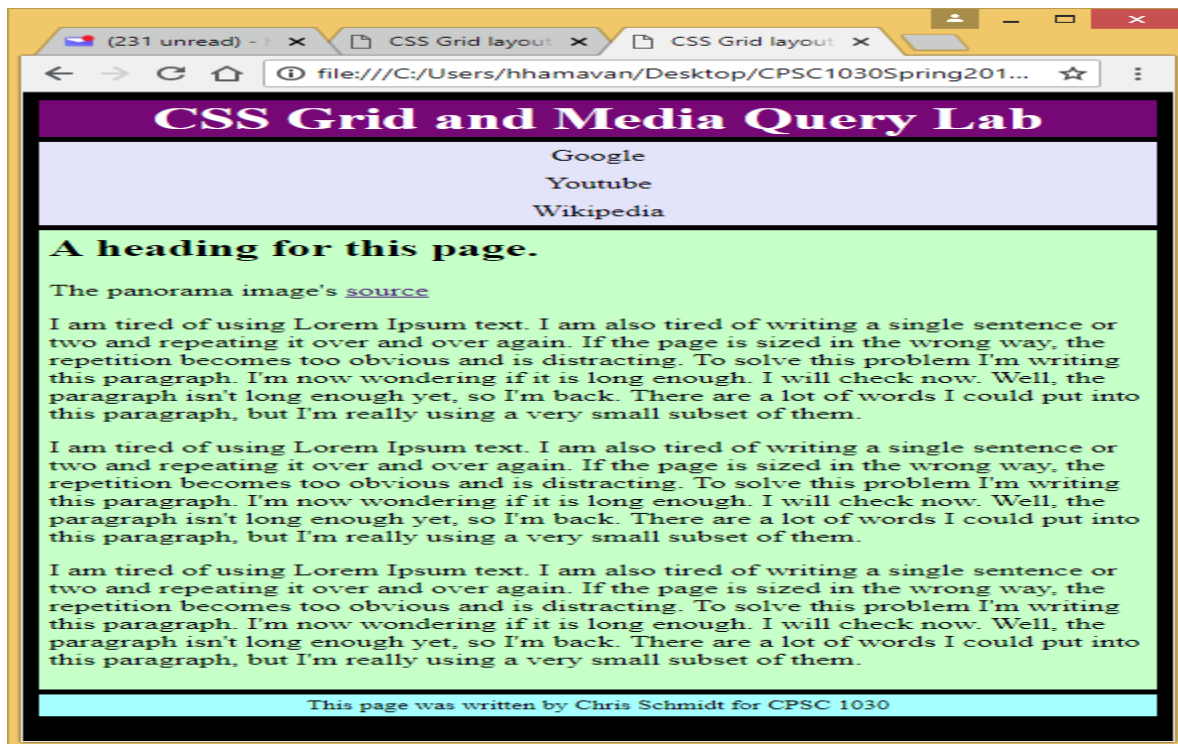

For any screen where the width of the viewport is greater than or equal to 800px

For any screen where the width of the viewport is greater than or equal to 600px

For any screen where the width of the viewport is smaller than 600px

## Deliverables

- Compress your lab13 folder and submit your zip file to BrightSpace.

## Required Files:

All the required files are on the O drive.

## Marking Scheme:

- 40 points total
  - 10 points for each viewport style.
